SUMMARY

Full stack developer who builds and runs MyRent, a multi-tenant SaaS in production (Next.js, TypeScript, Supabase/PostgreSQL), solo: from database schema and payments to tests, monitoring and support. Two years building client sites remotely for a US marketing agency (WordPress, Elementor, PHP). Fully remote and async; I use Claude Code daily and review every line before it ships.

EXPERIENCE

Founder & Full Stack Developer | MyRent, myrent.lat (Self-employed, Remote) Jul. 2025 - Present

- Rental management SaaS designed, built and operated solo in production: landlords manage properties, tenants, leases and payments.
- Next.js App Router + Server Actions, TypeScript, Supabase (PostgreSQL) with multi-tenant Row Level Security and role-based access (owner/admin/assistant/accountant/viewer).
- Mercado Pago payments with webhooks, immutable PDF receipts, transactional email (Resend), AI assistant with tool calls (Vercel AI SDK).
- Quality and ops: Vitest + React Testing Library + Playwright, Sentry and PostHog, ~48 SQL migrations, ES/EN i18n.

WordPress Developer | Dharma Digital Marketing Agency, Miami (Remote) Aug. 2024 - Jul. 2026

- Built and maintained client websites for a US digital marketing agency (WordPress, Elementor, custom CSS/JS), many accounts at once.
- Theme and template customizations with PHP hooks and functions.php; performance and on-page/local SEO work.
- Landing pages, Shopify and WooCommerce storefront tweaks, troubleshooting and support for client sites.

Full Stack Developer | FisiomFulness, Lima (Remote) Feb. 2024 - May. 2024

- Backend data model, relationships and CRUD with soft-delete (Node.js, Express, MongoDB) in a Scrum team.
- Product, stock and sales UI with Next.js and Tailwind CSS.

Frontend Developer | Club ADIP (Remote, Henry bootcamp project) Sept. 2023

- Club management platform (React, Nest.js, TypeScript): member accounts, news, online payments.
